EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Abdul Zindandi on 08 November 2005.

The application has been amended as follows:

a.) In claim 39, line 1, replace the word "of" with "for".

REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The instant application discloses a method and system for communication in a network. A search of prior art records fails to disclose a method comprising; "directing the first modem to release a portion of communication bandwidth used by the first modem; using the portion of communication bandwidth released by the first modem for the second modem to establish simultaneous communication over the common master loop between the network node and the first and second modems"; or "upon receiving a signal from the network node, releasing a portion of communication bandwidth used by the modem for one or more communication terminals coupled to the network node via the master loop, wherein the modem releases the portion of the communication bandwidth while maintaining a superframe of the communication bandwidth" as disclosed in claims 21 and 28, respectively. The prior art also fails to disclose a communication system comprising: "means for directing the first modem to release a portion of communication bandwidth used by the first modem; means for using the portion of communication bandwidth released by the first modem for the second modem to establish simultaneous communication over the common master loop between the network node and the first and second modems" or a system for operating a modem in a network comprising: "means for releasing a portion of communication bandwidth used by the modem, upon receiving a signal from the network node, for one or more communication terminals coupled to the network node via the master loop wherein the modem releases the portion of the communication bandwidth while maintaining a superframe of the communication bandwidth" as disclosed in claims 32 and 39, respectively.

Art Unit: 2634

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

CONCLUSION

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lawrence B Williams whose telephone number is 571-272-3037. The examiner can normally be reached on Monday-Friday (8:00-5:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kenneth Vanderpuye can be reached on 571-272-3078. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
